Awareness programme on Vocational Skill Training for Persons with Disabilities on dated 23.9.2015 at Composite Regional Centre (CRC), under the Department of Empowerment of Persons with Disabilities, Govt. of India, Patna

According to Census 2011, there are 2.68 Crore Persons with Disabilities (PwDs) in India (1.50 crore male and 1.18 crore female PwDs), about 1.34 crores persons with disabilities are in the employable age of 15 to 59 years in India and about 99 lakh persons with disabilities in the employable age group were non-workers or are marginal workers and Persons with disabilities are among the poorest in the population. Accordingly, In Bihar State there are 23.31 Lakh Persons with Disabilities (PwDs), which is 8.69 % of the total disabled population of the country and 2.23 % of the total population of the State (10.41 crores). Even though, disabled people constitute a significant percentage of the population of Bihar /India, their need for meaningful employment largely remains unmet, in spite of implementation of "The Persons with Disability Act, 1995". In the overall population, the number of disabled is proportionately higher in rural areas, accentuated by general poverty considerations and poor access to health services. The rural disabled are significantly disconnected from skills and markets.

2. Improving vocational training and employment opportunities for people with disability is a critical element for enhancing the quality of life for individual with disability, their families, but there are also substantial gains for the broader economy. There are substantial costs to individuals and to society associated with these poor employment outcomes for people with disability. The World Bank considers that leaving people with disability, outside the economy, translates into a foregone GDP of about 5% to 7%. In addition to the individual and family benefits, there is also a strong economic imperative to increased labour force participation which will help to address country's shortage of skilled labour force, while at the same time reducing fiscal pressures associated with welfare dependency.

3. There is urgent need to scale up the skill training infrastructure in view of the huge demand- supply gap and to improve the training, being offered through various institutions / mechanisms is non homogenous, lacks quality and is low on employability and to enhance low access of the present training infrastructure to the PwDs in rural areas and involvement of private sector in the skill training of

D. K. Mishra

PwDs. The skill training offered by various ministries/departments to the PwDs is fragmented or overlapping.

4. A National Action Plan for Skilling the Persons with Disabilities has been launched by the Department of Persons with Disabilities (DEPwD), Govt. of India. The vocational / skill training would be provided by a network of skill training providers led by NGOs, private training institutions and Public Sector/Govt. The vocational training would be provided by a cluster of training providers scattered over the country, having an established track record of providing skill training with high employability ratio. These training partners would be provided outcome based financial support by Deptt. of Empowerment of Persons with Disabilities (DEPwD) and Ministry of Skill Development & Entrepreneurship (MSDE). Synergistic support would be provided to these training providers by the National Institutes and Composite Regional Centre (CRCs) of DEPwD, training institutions of Ministry of Human Resource Development, Ministry of Micro, Small & Medium Enterprises, other Central Ministries and State Governments.

5. In view of the above and create awareness among persons with disabilities about the National Action Plan for Skilling the Persons with Disabilities, proposed trades, training duration, post training soft loan schemes, training institutions etc, an awareness programme is being organized by the CRC Patna on 23.9.2015 from 10:00 AM to 5:00 PM at CRC Patna. We propose to cover all types of disabled, irrespective of age caste or creed. The women with disabilities are given priority. You are therefore requested to disseminate the above information about the proposed one day awareness programme on Vocational Skill Training for Persons with Disabilities among needy persons with disabilities.
